RE: Water Quality Certification - Order #3244/Corps Public Notice 200500949 - Expansion of existing dock facilities, new dredging, maintenance dredging of the existing moorage basin, and maintenance dredging of the existing entrance channel in Pickering Passage, at Home Island near Shelton, Mason County, Washington.

Dear Mr. Baker:

The above-referenced public notice for proposed work in waters of the state has been reviewed in accordance with all pertinent rules and regulations. On behalf of the State of Washington, we certify that the work proposed in the public notice complies with applicable provisions of Sections 301, 302, 303, 306 and 307 of the Clean Water Act, as amended, and other appropriate requirements of State law. This letter also serves as the State response to the Corps of Engineers.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with the Applicant's determination that this work is consistent with the approved Washington State Coastal Zone Management Program.

This certification is subject to the conditions contained in the enclosed Order and may be appealed by following the procedures described in the Order. If you have any questions concerning the content of the Order, please contact Helen Pressley at (360) 407-6076.

Sincerely,

A handwritten signature in black ink, appearing to read "Brenden McFarland".

)	

TO: Mr. George Baker
Olympia Yacht Club
6919 Fairway Lane SW
Olympia WA 98501

On December 20, 2005 the Olympia Yacht Club submitted a Joint Aquatic Resource Permit Application (JARPA) to the Department of Ecology (Ecology) requesting a Section 401 Water Quality Certification. A public notice regarding the request was distributed by the U.S. Army Corps of Engineers (Corps) for the above-referenced project pursuant to the provisions of Chapter 173-225 WAC on April 3, 2006.

The work for this project includes expansion of the existing docking facilities, new dredging, maintenance dredging of the existing moorage basin and maintenance dredging of the existing entrance channel. The work further consists of expanding the west float system by installing two new floats, each 100 feet long and 8 feet wide, and 12 steel piles. The new dredging and maintenance dredging consists of dredging an area up to 376 feet long and 303 feet wide to a depth of -8 Mean Low Lower Water (MLLW) in the existing moorage basin and an area up to 533 feet long and 50 feet wide to a depth of -8 MLLW in the existing entrance channel. Proposed dredging depths include -1 foot of over-dredge. Up to 8,650 cubic yards (cy) of sediments will be removed from the moorage basin and entrance channel by clamshell dredge and barged to the Anderson Island open water disposal site. The dredging is expected to take 18 days. Pile driving will be done with an impact hammer using wood blocks on the steel piles for sound attenuation. Pile driving is expected to take 4 days.

The purpose of this project is to expand and maintain adequate docking facilities for club members.

The project is located in Pickering Passage, at Home Island, near Shelton, Mason County, Washington.

AUTHORITIES:

In exercising authority under 33 U.S.C. § 1341, 16 U.S.C. § 1456, RCW 90.48.120, and RCW 90.48.260, Ecology has examined this application pursuant to the following:

1. Conformance with applicable water quality-based, technology-based, and toxic or pretreatment effluent limitations as provided under 33 U.S.C. §1311, 1312, 1313, 1316, and 1317 (FWPCA § 301, 303, 306 and 307);
2. Conformance with the state water quality standards contained in Chapter 173-201A WAC and authorized by 33 U.S.C. §1313 and by Chapter 90.48 RCW and with other applicable state laws; and
3. Conformance with the provision of using all known, available and reasonable methods to prevent and control pollution of state waters as required by RCW 90.48.010.

WATER QUALITY CERTIFICATION CONDITIONS:

Through issuance of this Order, Ecology certifies that it has reasonable assurance that the activity as proposed and conditioned will be conducted in a manner that will not violate applicable water quality standards and other appropriate requirements of state law. In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260, and Chapter 173-201A WAC, water quality certification is granted to the Applicant subject to the conditions within this Order.

Certification of this proposal does not authorize the Applicant to exceed applicable state water quality standards (Chapter 173-201A WAC), or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this certification shall absolve the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters or sediments occurring as a result of project construction or operations.

A. General Conditions:

1. For purposes of this Order, the term "Applicant" shall mean the Olympia Yacht Club, and its agents, assignees and contractors.
2. For purposes of this Order, all submittals required by its conditions shall be sent to Ecology's Headquarters to the Federal Permit Coordinator, PO Box 47600, Olympia WA 98504. Any submittals shall reference Order No. 3244 and Corps No. 200500949.
3. Work authorized by this Order is limited to the work described in the JARPA received by Ecology on December 20, 2005. The Applicant will be out of compliance with this Order and must reapply with an updated application if the information contained in the JARPA is voided by subsequent changes to the project not authorized by this Order.
4. Within 30 days of receipt of an updated JARPA Ecology will determine if the revised project requires a new water quality certification and public notice or if a modification to this Order is required.

5. This Order shall be rescinded if the Army Corps of Engineers does not issue an individual 404 water quality permit.
6. This Order does not exempt, and is provisional upon compliance with other statutes and codes administered by federal, state, and local agencies.
7. Copies of this Order shall be kept on the job site and readily available for reference by Ecology personnel, the project manager, construction managers and lead workers, and state and local government inspectors.
8. The Applicant shall provide access to the project site and the mitigation site upon request by Ecology personnel for site inspections, monitoring, necessary data collection, and/or to ensure that conditions of this Order are being met.
9. Nothing in this Order waives Ecology's authority to issue additional orders if Ecology determines that further actions are necessary to implement the water quality laws of the state. Further, Ecology retains continuing jurisdiction to make modifications hereto through supplemental order, if additional impacts due to project construction or operation are identified (*e.g.*, violations of water quality standards, erosion, etc.), or if additional conditions are necessary to further protect water quality.
10. The Applicant shall ensure that all appropriate project engineers and contractors at the project site have read and understand relevant conditions of this Order and all permits, approvals, and documents referenced in this Order. The Applicant shall provide Ecology a signed statement (see Attachment A for an example) from each project engineer and contractor that they have read and understand the conditions of this Order and the above-referenced permits, plans, documents and approvals. These statements shall be provided to Ecology before construction begins at the project.
11. This Order does not authorize direct, indirect, permanent, or temporary impacts to waters of the state or related aquatic resources, except as specifically provided for in conditions of this Order.
12. Any person who fails to comply with any provision of this Order shall be liable for a penalty of up to ten thousand dollars (\$10,000.00) per violation for each day of continuing noncompliance.

B. Water Quality:

1. No Further Impairment of Existing Water Quality.

Pickering Passage, (WRIA 14, WA-PS-0090) is a Class AA water of the state. Certification of this proposal does not authorize the Applicant to exceed applicable state water quality standards (173-201A WAC) or sediment quality standards (Chapter 173-

204 WAC). Water quality criteria contained in WAC 173-201A-030(1) and WAC 173-201A-040 shall apply to this project.

This Order does not authorize temporary exceedances of water quality standards beyond the limits established in WAC 173-201A-110(3). Furthermore, nothing in this certification shall absolve the Olympia Yacht Club from liability for contamination and any subsequent cleanup of surface waters or sediments occurring as a result of project construction or operations.

C. Construction:

1. Work in or near waters of the state shall be done so as to minimize turbidity, erosion, and other water quality impacts. Sediment and erosion control Best Management Practices suitable to prevent exceedances of state water quality standards (e.g. filter fences, silt curtains, etc.), shall be in place before starting work at the impact site. BMPs shall be maintained throughout construction.
2. All construction debris shall be properly disposed of on land so that it cannot enter the waterway or cause water quality degradation to state waters.
3. All excess excavated upland material shall be disposed of above the 100-year floodplain and shall be contained so as to prevent its re-entry into waters of the state.
4. Erosion control devices (e.g., filter fences, silt or bubble curtains, etc.) suitable to prevent exceedances of state water quality standards shall be in place before starting project construction and shall be maintained throughout construction.
5. Wash water containing oils, grease, or other hazardous materials resulting from wash down of equipment or working areas shall not be discharged into state waters except as authorized by an NPDES or state waste discharge permit.
6. Piling Removal and Placement:
 - a. During piling removal a containment boom and absorbent pads shall be placed around the perimeter of the work area to capture wood debris and other materials released into the waters as piling are pulled. All accumulated debris shall be collected and disposed of upland at an approved disposal site.
 - b. During inwater work the Applicant shall have a boat available on site at all times to retrieve debris from the water.
 - c. Piles removed from substrate shall be removed immediately from the water into a barge lined with filter fabric or straw bales around the perimeter or upland into an area that is similarly contained. The pile shall not be shaken, hosed-off, left hanging to drip or any other action intended to clean or remove adhering material from the pile.

- d. All existing creosote treated pilings shall be completely extracted, removed from marine waters, and disposed of at an approved upland disposal site. If the pilings are cannot be completely removed they shall be treated as directed by the Washington Department of Fish and Wildlife Hydraulic Project Approval.
- e. All new pilings shall be steel.
- f. The Applicant shall employ a bubble curtain or equivalent Best Management Practice around steel piles when using an impact/vibratory hammer. The bubble curtain shall be deployed in a manner to ensure that bubbles completely engulf the piles during the impact driving.

D. Dredging and Disposal:

- 1. All dredging is to be done using a barge-mounted floating clamshell dredge. Use of any other type of dredge will require prior approval from the DMMP agencies.
- 2. Up to 8,650 cy of dredged material will be disposed of at the Puget Sound Dredge Disposal Analysis open-water disposal site near Anderson and Ketron Islands.
- 3. All debris (larger than 2 feet in any dimension) shall be removed from the dredged sediment prior to disposal. Similar sized debris found floating in the dredging or disposal area shall also be removed. All debris shall be disposed of at an appropriate upland location.
- 4. A **Dredging Plan** is required and shall be made available for review and approval at the pre-dredge meeting to be convened at the Seattle Corps of Engineers office prior to the start of dredging. One week prior to the pre-construction meeting, a copy of the plan shall be sent to the Federal Permit Coordinator, Department of Ecology, PO Box 47600, Olympia WA 98504-7600 for review prior to the meeting.

E. Emergency and Contingency Measures:

- 1. Any in-water work that is out of compliance with the provisions of this Order, or any discharge of oil, fuel, or chemicals into state waters or onto land with a potential for entry into state waters, is prohibited. If these occur, the operator shall immediately take the following actions:
 - a. Cease operations.
 - b. Assess the cause of the water quality problem and take appropriate measures to correct the problem and/or prevent further environmental damage.
 - c. In the event of a discharge of oil, fuel, or chemicals into state waters, or onto land with a potential for entry into state waters, containment and cleanup efforts shall begin immediately and be completed as soon as possible, taking precedence over

normal work. Cleanup shall include proper disposal of any spilled material and used cleanup materials.

2. Spills into state waters, spills onto land with a potential for entry into state waters, or other significant water quality impacts, shall be reported immediately to Ecology's Southwest Regional Spill Response Office at (360) 407-6000, a 24-hour number.
3. Fuel hoses, oil drums, oil or fuel transfer valves and fittings, etc., shall be checked regularly for drips or leaks, and shall be maintained and stored properly to prevent spills into state waters, including wetlands.

H. Timing Requirements:

1. In-water work is subject to a fishery closure window described in Washington State Department of Fish and Wildlife's (WDFW) Hydraulic Project Approval (HPA) #100339-1 dated November 14, 2005. Any project change that requires a new or revised HPA should also be sent to Ecology for review.

G. Notification Requirements:

1. **The department shall be notified at least 72 hours prior to the start of dredging.** Contact Helen Pressley at Department of Ecology, PO Box 47600, Olympia WA 98504-7600, (360) 407-6076, or hpre461@ecy.wa.gov.

H. Appeal Process:

You have the right to appeal this Order to the Pollution Control Hearings Board. Pursuant to chapter 43.21B RCW, your appeal must be filed with the Pollution Control Hearings Board, and served on the Department of Ecology within thirty (30) days of the date of your receipt of this document.

To appeal this Order, your notice of appeal must contain a copy of the Ecology Order you are appealing.

Your appeal must be filed with:

The Pollution Control Hearings Board
4224 - 6th Avenue SE, Rowe Six, Bldg. 2
P.O. Box 40903
Lacey, Washington 98504-0903

Your appeal must also be served on:

The Department of Ecology
Appeals Coordinator
P.O. Box 47608
Olympia, Washington 98504-7608.

In addition, please send a copy of your appeal to:

Federal Permit Appeals Coordinator
Department of Ecology
P.O. Box 47600
Olympia, Washington 98504-7600

For additional information: Environmental Hearings Office Website: <http://www.eho.wa.gov>

Your appeal alone will not stay the effectiveness of this Order. Stay requests must be submitted in accordance with RCW 43.21B.320. These procedures are consistent with Ch. 43.21B RCW.

Dated May 8, 2006 at Lacey, Washington.

Brenden McFarland, Section Manager
Shorelands and Environmental Assistance Program
Department of Ecology
State of Washington

Attachment #A

Water Quality Certification Statement of Understanding

I, _____, state that, as an agent or contractor for construction and/or dredging at the Olympia Yacht Club Home Island Moorage Basin, Mason County, Washington. I have read and understand the relevant conditions of Washington State Department of Ecology Water Quality Certification Order #3244 and the applicable permits and approvals referenced therein which pertain to the project-related work for which I am responsible.
